- (1.) Application for Subdivision Review**
- (2.) Map of Lot Size & Layout.** The drawing or set of drawings shall show existing conditions and proposed site improvements including, but not limited to, wet areas, easements, adjacent property owners and public rights-of way, moderate to severe slope or grade issues, landscaping, parking, lighting, proposed and existing building footprint for each lot, septic system test pits and perc test results (if applicable).
- (3.) Short or Long Environmental Assessment Form (EAF)** pursuant to the N.Y.S. Environmental Quality Review Act (SEQRA). An EAF is a form or forms filled out by the applicant for the purpose of aiding the Rosendale Planning Board in both classifying your project as a Type I, Type II or Unlisted action under SEQRA and in the determination of significance of the impact your project will have on the environment. Whether a short or long form is required is dependent upon whether the application is classified as “Type I” or “Unlisted.” Type I actions usually includes large scale projects that could potentially have a significant adverse impact on the environment and may, at the discretion of the Planning Board, require that an Environmental Impact Statement (EIS) be prepared. Type II actions are not subject to SEQRA review and usually require only a Short Form EAF and can include actions such as maintenance projects, in-kind replacement projects, single unit residential dwelling construction on an existing parcel and area and lot line variances. Unlisted Actions are those actions not specifically described as Type I or Type II Actions and include land subdivisions. A comprehensive list of SEQRA classifications can be found on the New York State Department of Environmental Conservation website at:
