Damaging Wind Gusts, Heavy Rain May Cause Power Outages in Central Hudson Service Area

Central Hudson Gas & Electric Corporation is readying crews and advising customers to prepare for potentially severe weather that is expected to move through the region starting on Tuesday night into Wednesday. Forecasts are calling for heavy rains of 2-3 inches in some areas and wind gusts of up to 60 mph which could topple trees and tree limbs, creating the potential for service interruptions.

“We are closely monitoring the weather system that will be moving into the area on Tuesday and we will be prepared to respond if outages do occur,” said Ryan Hawthorne, Vice President of Electric Engineering and Operations. “We have secured approximately 120 additional line workers from Kentucky, Ohio and New York who will be here on Tuesday to help us restore any outages as quickly as possible.”

The heavy rains in the forecast, coupled with warm temperatures melting the recent snow fall, have the potential to cause significant flooding in some areas as well.

Heavy flooding may undermine natural gas lines and customers are urged to report gas odors they may detect by doing the following:

- **STOP** what they are doing. Do not light or use a match. Do not turn lights on or off or use a flashlight, cell phone or telephone. Do not turn on any other appliance or electric/electronic device and do not flush or run water.
- **GO** outside immediately.
- **LET US KNOW** by calling our gas odor hotline at 1-800-942-8274, or call 911.

“Basements, too, may become flooded, and residents should be especially cautious before entering a flooded basement or crawlspace.” He explained that electrical panels or gas piping may become compromised and create indoor hazards. “If in doubt, contact the local police, fire department or emergency responder,” Hawthorne said.

Central Hudson prepares for storms by preparing crews, stocking supplies and materials, communicating with community leaders and following an approved storm plan. Central Hudson also takes proactive steps before storms strike to minimize service interruptions, including enhanced vegetation management and danger tree removals, and regular maintenance and upgrades to power lines serving communities.

Residents are advised to **stay at least 30 feet away from downed power lines** and remember that lines may be entangled and hidden in fallen trees and limbs. Residents should also **assume all downed lines are live.**

Customers can prepare for the storm and potential electric service interruptions by:

- Paying attention to weather advisories, storm outage updates and/or shelter information. Visit hudsonvalleyweather.com for the latest forecast information.
- Charging electronic devices in order to connect with Storm Central, Central Hudson’s outage information and reporting site;
- Keeping handy a flashlight and fresh batteries;
- Having a battery-powered radio to remain informed of restoration efforts;
- Confirming adequate packaged or canned foods that require no refrigeration or cooking;
- Avoiding opening a refrigerator unnecessarily during outages, so that food lasts longer, an unopened refrigerator can keep food fresh for 4 hours;
- Having a non-electric can opener;
- Keeping an emergency supply of bottled water on hand for drinking and washing; and
- Filling bathtubs with water as added reserves.

Residents are advised to keep safety in mind, particularly during power interruptions:

- Never use outdoor gas or charcoal grills indoors, as they pose a fire hazard and over time can give off carbon monoxide gas;
- Beware of fallen trees and limbs, and use caution when traveling;
- Avoid the use of candles for illumination due to fire hazards;
- Follow the manufacturer’s safety instructions on the use of emergency generators, and be sure to shut off the main breaker when in use and operate the units outdoors;
- Operate cars and motor vehicles outdoors only, and never inside the garage; and
- Avoid travel along roadways as hazardous conditions may cause driving accidents, including those involving utility poles which may cause power interruptions.

Customers can stay informed of storm and restoration conditions in the following ways:

- **By text messaging:** Customers should enroll in Central Hudson's Texting Program to use text messaging to report their power condition and to obtain repair status. To enroll, visit CentralHudson.com/Alerts or text REG to 236483;
- **On the Web:** Visit CentralHudson.com/Storms to report outages and obtain restoration updates;
- **Via smart phones:** A mobile version of the Central Hudson's website can be accessed by web-enabled cell phones and mobile devices at <https://mobile.CenHud.com>. Free Central Hudson mobile applications for Android and Apple and are also available by logging onto www.cenhud.com/mobileapp;
- **Through social media:** "Like" Central Hudson on Facebook (Facebook.com/CentralHudson) and "Follow" on X (formerly Twitter) (www.Twitter.com/CentralHudson); and
- **By phone:** Call the Central Hudson PowerLine at (845) 452-2700 or 1-800-527-2714, and please use the automated system to report or monitor your power condition.
- If a member of your household needs electricity to operate life sustaining equipment, please contact customer service at (845) 452-2700.
